- 1 Data management issues in electronic commerce: Supporting global user profiles  
through trusted authorities

Ibrahim Cingil

March 2002 **ACM SIGMOD Record**, Volume 31 Issue 1**Publisher:** ACM PressFull text available: pdf(497.02 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#)

Personalization generally refers to making a Web site more responsive to the unique and individual needs of each user. We argue that for personalization to work effectively, detailed and interoperable user profiles should be globally available for authorized sites, and these profiles should dynamically reflect the changes in user interests. Creating user profiles from user click-stream data seems to be an effective way of generating detailed and dynamic user profiles. However a user profile gener ...

1 User modeling II: Evaluating adaptive user profiles for news classification

 Ricardo Carreira, Jaime M. Crato, Daniel Gon?lves, Joaquim A. Jorge

January 2004 **Proceedings of the 9th international conference on Intelligent user interface**

Publisher: ACM Press

Full text available:  [pdf\(132.20 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Never before have so many information sources been available. Most are accessible online and some exist on the Internet alone. However, this large information quantity makes interesting articles hard to find. Modern Personal Digital Assistants (PDAs), mobile phones, and the advent of ubiquitous computing will further complicate matters. Away from the desktop, the time to select important articles might be even harder to find. Strategies to select relevant information are sorely needed. One such ...

1 A prediction system for multimedia pre-fetching in Internet

Zhong Su, Qiang Yang, Hong-Jiang Zhang

October 2000 **Proceedings of the eighth ACM international conference on Multimedia**

Publisher: ACM Press

Full text available: [pdf\(646.67 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

The rapid development of Internet has resulted in more and more multimedia in Web content. However, due to the limitation in the bandwidth and huge size of the multimedia data, users always suffer from long time waiting. On the other hand, if we can predict the web object or page that the user most likely will view next while the user is viewing the current page, and pre-fetch the content, then the perceived network latency can be significantly reduced. In this paper, we present an n-gram bas ...

## Nothing Found

Your search for **+abstract:calculate +abstract:site +abstract:user +abstract:profile** did not return any results.

You may want to try an [Advanced Search](#) for additional options.

Please review the [Quick Tips](#) below or for more information see the [Search Tips](#).

### Quick Tips

- Enter your search terms in lower case with a space between the terms.

sales offices

You can also enter a full question or concept in plain language.

Where are the sales offices?

- Capitalize proper nouns to search for specific people, places, or products.

John Colter, Netscape Navigator

- Enclose a phrase in double quotes to search for that exact phrase.

"museum of natural history" "museum of modern art"

- Narrow your searches by using a **+** if a search term must appear on a page.

museum +ar t

- Exclude pages by using a **-** if a search term must not appear on a page.

museum -Par is

Combine these techniques to create a specific search query. The better your description of the information you want, the more relevant your results will be.

museum +"natural history" dinosaur -Chicago
